

Review and remove inactive accounts

Bsure recommended actions

5 recommended actions

1. Review and clean-up privileged accounts
2. Remove inactive accounts and free up licenses
3. Protect ALL accounts with MFA, also the inactive ones
4. Review and clean-up overprivileged non-human identities (applications)
5. Activate SSO on all applications that supports it and scope access

5 recommended actions

1. Review and clean-up privileged accounts
- 2. Remove inactive accounts and free up licenses**
3. Protect ALL accounts with MFA, also the inactive ones
4. Review and clean-up overprivileged non-human identities (applications)
5. Activate SSO on all applications that supports it and scope access

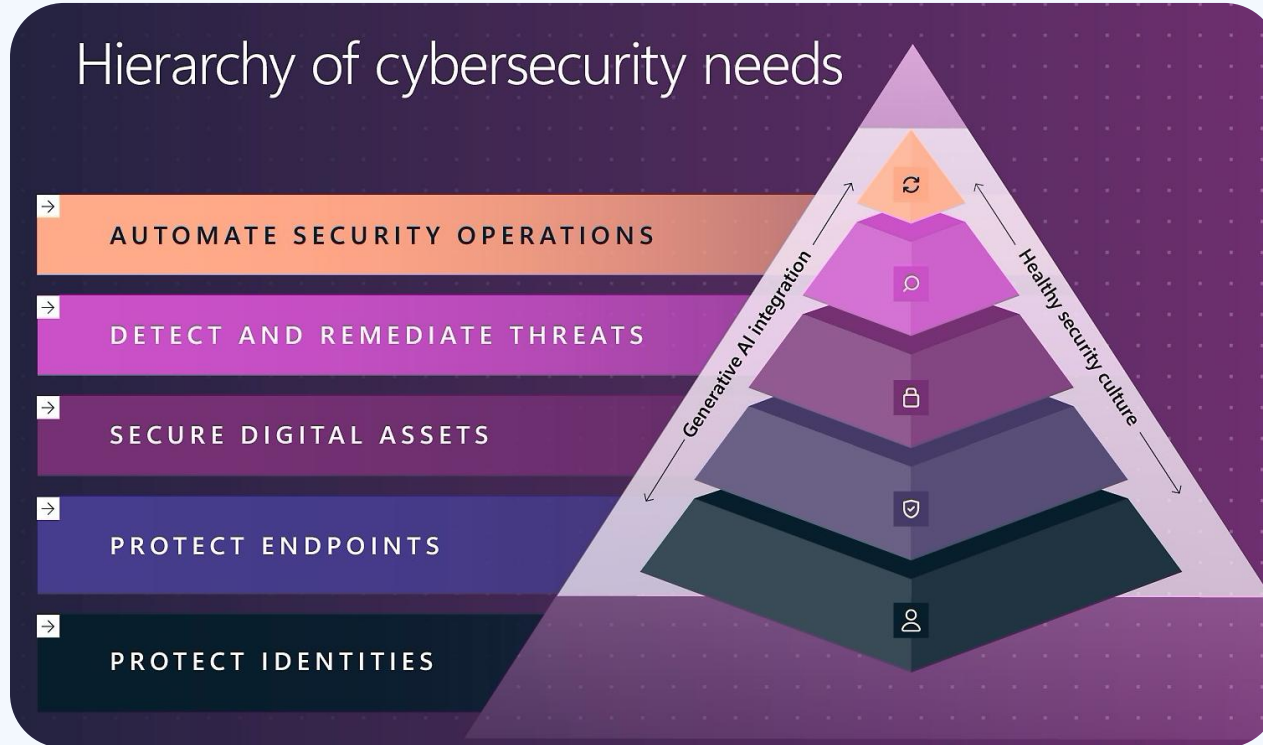

~40% of enabled accounts in Entra ID are inactive.

- Lacking Identity Lifecycle Management processes
- Unmanaged guests and external accounts
- Forgotten test and admin accounts
- Resource accounts not disabled

~20% of Microsoft 365 licenses are unused.

- Unassigned licenses
- Licensed inactive users
- Licensed disabled users
- Overlapping licenses

Why should I clean up?

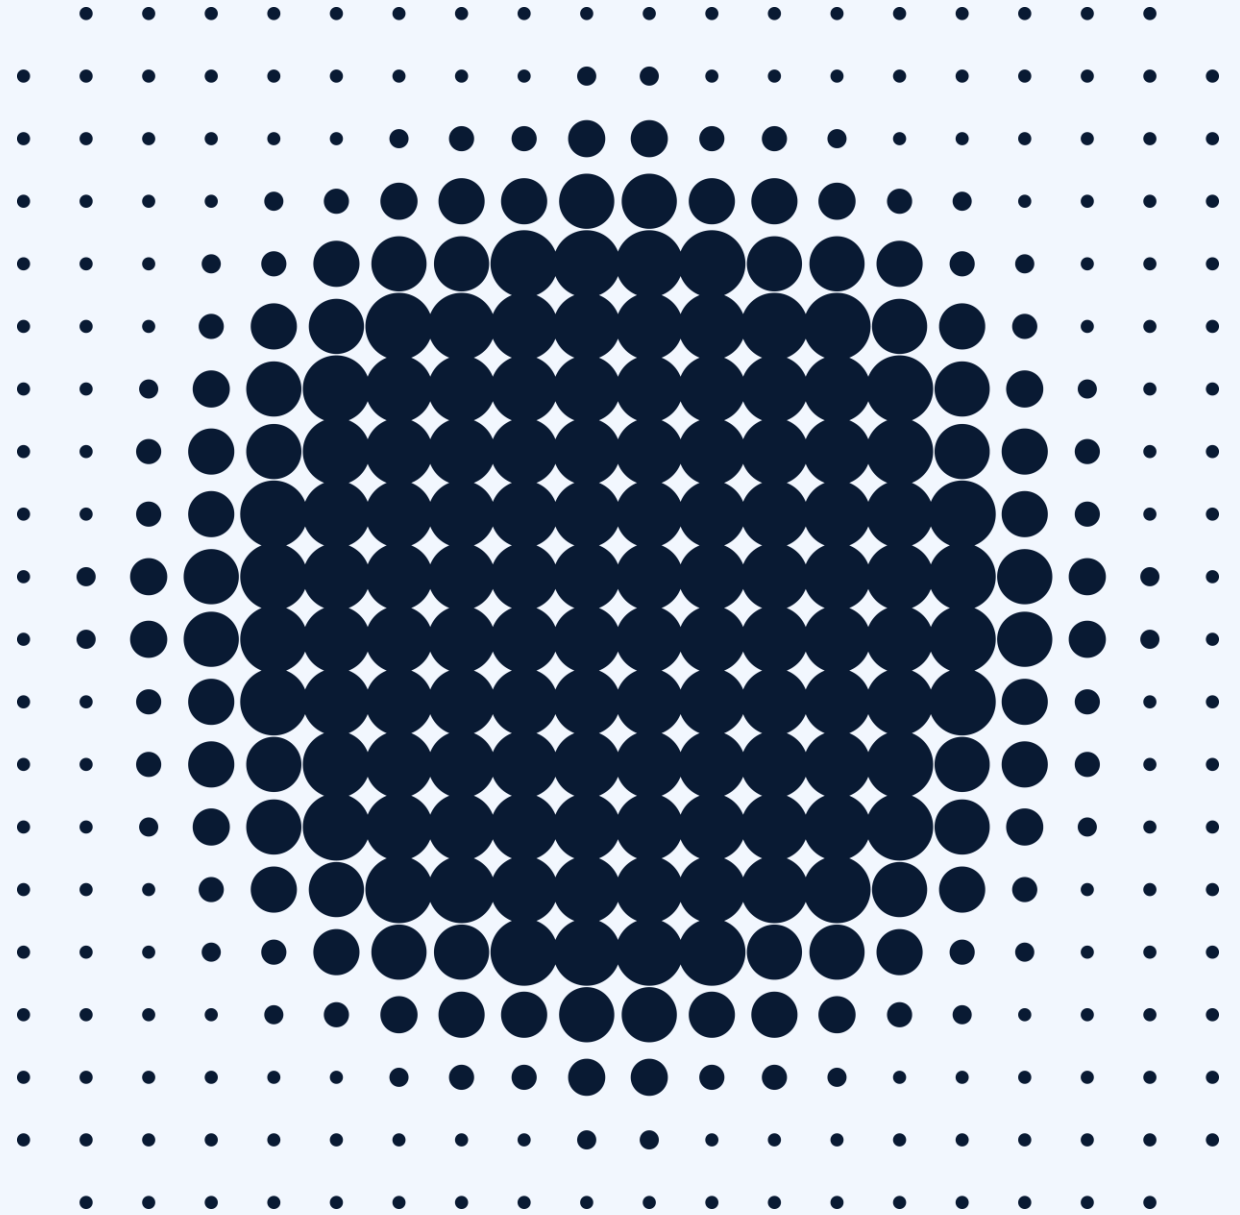

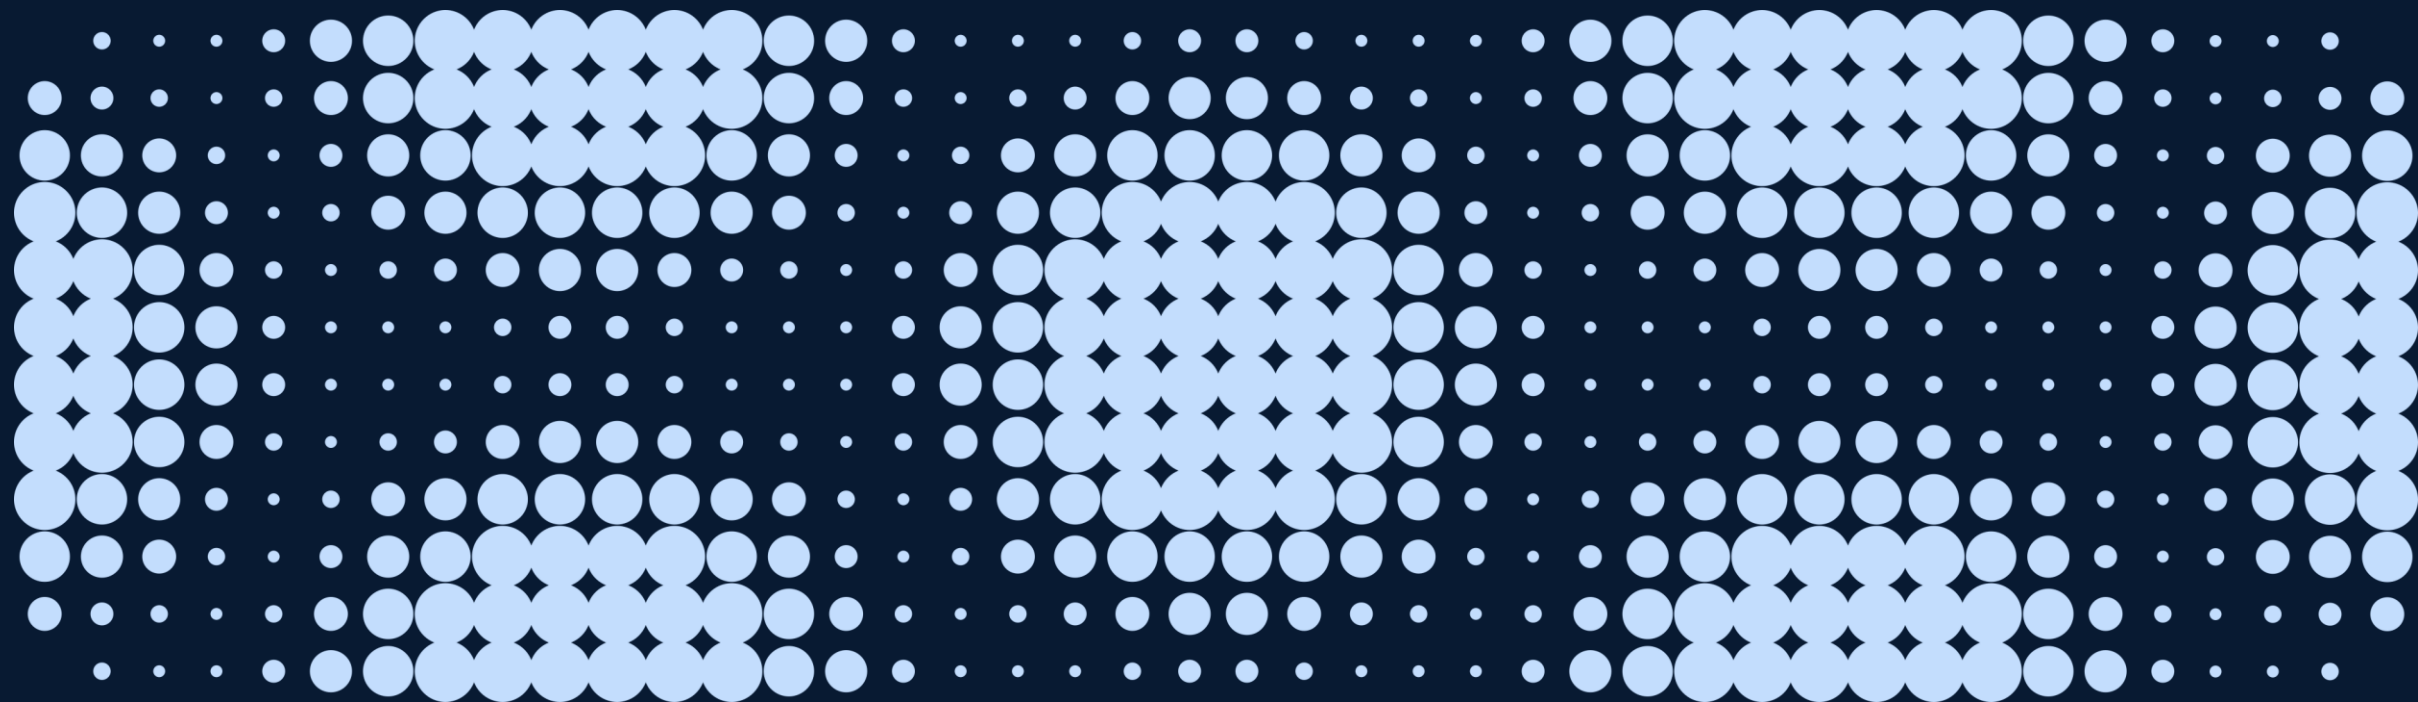

- Reduce attack surface
- Improve MFA coverage
- Discover flawed processes

“Attackers don’t break in, they log in”
